“Let’s Do Business with a Member”

CBIA’s objective is to help our members get more new homes built in California faster and more affordably, by developing public policy advocacy efforts that directly impact your business interests.

The membership of companies that provide our industry with products and services, help CBIA to provide strong leadership through advocacy, education, and information.

We are very pleased to share our new **CBIA Directory of Products and Services**, which provides contact information for member companies who are investing in CBIA efforts that protect and strengthen our industry and your business directly!

We request that you please consider the products and services provided by these CBIA Partner and CBIA Board Member companies.

Members working with other Members helps CBIA have a stronger voice!

Thank you for helping CBIA fight for you!

Director of Business Development

CBIA - PROTECTING YOUR BUSINESS

Even just one misguided code change or legislative measure at the state level can have a major impact on our industry and your company's future success.

With this in mind:

The CBIA Board of Directors has established a goal to invest their purchasing dollars with Members that directly support CBIA.

The companies in this Directory realize that we are all "in this together" and are investing in CBIA efforts to protect our industry and your business.

May we encourage you to consider the products and services offered by the CBIA Partners and CBIA Board Members in this Directory?

If you would like to discuss how your company can be included in the CBIA Directory of Products and Services – please contact Beth Harris, Director of Business Development at bharris@cbia.org.

PSD Group has spent more than 40 years helping Northern California development teams navigate one of the most frustrating parts of land development: dry utilities. We know how quickly unclear scope, shifting requirements, and slow coordination can turn into delays and budget pressure, and we've built our work around preventing that. From early feasibility and master planning to final design and installation support, we guide projects through the full dry utility lifecycle. We handle applications and submissions, coordinate directly with utility engineers, and deliver utility-approved designs that align with jurisdictional requirements and real-world constructability.
